The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- The trustees of UK registered and certain non-UK registered defined contribution occupational pension schemes, which may be classified as either retail clients or professional clients, who wish to offer this fund to their members on a net of fees basis.
- Although investors can take their money out at any time, the recommended minimum holding period is 5 years.
- Members accessing this fund through an employer's pension scheme should refer to their pension scheme contact or speak to an independent financial advisor if they have any questions about the fund and its suitability

FUND CHARACTERISTICS

The fund employs an index tracking strategy, aiming to replicate the performance of its benchmark. We follow a pragmatic approach to managing index funds, either investing directly in the securities of that index, or indirectly through other L&G funds. The fund may also hold gilts to provide liquidity and to ensure that the fund's duration remains within tolerance.

PORTFOLIO BREAKDOWN

All data source L&G unless otherwise stated. Totals may not sum due to rounding. In order to minimise transaction costs, the Fund will not always own all the assets that constitute the index and on occasion it will own assets that are not in the index. The number of fund holdings can differ from the index due to corporate events and proxy holdings.

Celebrating 35+ Years

INDEX FUND MANAGEMENT TEAM

The skill set and expertise we have developed over 35+ years in index management has allowed us to continuously evolve our investment processes. The Index Fund Management team comprises 30 fund managers with an average experience of 15 years, supported by 33 broader team members. Management oversight is provided by Dave Barron, Global Head of Index, ETFs & Systematic Solutions. The team also has full access to the resources and research of other specialists within L&G, including economists and strategists.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The return from your investment is not guaranteed and therefore you may receive a lower or higher return than you anticipated. There will be a variation in performance between funds with similar objectives due to the different assets selected.
- PMC's charges and associated transaction costs are subject to change, with notice for the former and without notice for the latter. Charges and transactions costs deducted from the policy reduce your potential for capital growth in the future.
- Tax rules and the treatment of income and capital gains could change in the future and may be applied retrospectively.
- Inflation reduces the purchasing power of money over time as the cost of purchasing goods and services increases. If the rate of inflation exceeds the rate of return on your portfolio, it will erode the value of your portfolio and its investments in real terms.
- In extreme market conditions it may be difficult to realise assets held for a fund and it may not be possible to redeem units at short notice. We may have to delay acting on your instructions to sell or the price at which you cancel the units may be lower than you anticipated.
- The value of a fund's assets may be affected by uncertainties such as international political developments, market sentiment, economic conditions, changes in government policies, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which investment may be made.
- PMC seeks to mitigate counterparty risk wherever possible on behalf of its policyholders through a variety of measures which include: each fund's non-cash assets being held with independent custodians, sweeping cash (where appropriate) overnight into the L&G's range of Liquidity funds (above a deminimus level), using the delivery versus payment system when settling transactions and the use of central clearing for exchange traded derivatives and forward foreign exchange transactions. However, in the event of the failure of a counterparty, custodian or issuer there is a residual risk that a fund may suffer asset losses which are unrecoverable.
